lists and new students.**

We are also taking names for summer camp this summer. Please let Teacher Jodi know if you need child care for summer. We have a limited amount of openings

Teacher Martha's Class

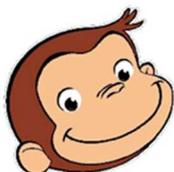

Safe in a shipwreck was our Bible story this week. We watched some videos that showed ships in bad weather on the open water. How scary would that be! We all agreed that it would be, but with Jesus on our side, we can give Him all of our worry. God promised those on that ship that none would perish though it would still be rough. We can trust God has a plan for all of us, but He didn't say it would be easy all of the time...but to trust Him.

We are continuing to work on letter and number knowledge. We have practiced using songs, toys, puzzles, marbles, cutting magazine letters, and white boards. The kids are doing great. Many are able to write their names all on their own. Some need to look at their names to write them, but others are doing it all on their own! They are so proud of their accomplishments!

If you want a conference, please come and see me. Bring your calendar and we will make arrangements. I had 1 parent sign up on the sign up sheet, but I know I have had more inquire. Have a wonderful weekend!

Curious Kinders News

Dear Families, This week we began a new unit on Jesus, the miracles He did, and the way He treated everyone. We often hear the phrase, "What would Jesus do?" and decide if we are making good choices. For math, we began the process of learning how to tell time analogue and digital for the o'clock times. For Language arts, the kids are learning how to blend letters to form words and read simple sentences. We are continuing to review "Meet the Sight Words" DVD #2 & 1. The kids are really doing well with them. We also learned about Balto, a world famous dog. Because he lived in Alaska, we are learning about the animals that live in that region.

On Tuesday, February 8, we will celebrate our 100th day of school. Please have your child bring 100 of something that can be easily carried in a bag by your child. They will have an opportunity to share what they brought in class. Then they will bring their 100 items back home.

Have a great weekend! Mrs. Powell

Mrs. Davidson's Classroom

We had a substitute teacher because Mrs. Davidson had to be in some meetings. We learned some sign-language songs and some math and phonics songs.

Basketball and some games were in PE and we worked on personal best skills.

In Social Studies we have been making passport booklets and learning about different countries (what language is spoken and the capitols and what they are famous for. In Bible we are learning about Ruth and her family tree. Mrs. Davidson came back on Thursday and we were back to "normal"

Mrs. Messecar's Classroom

This week we have been studying about the life of people in the cities in the 1880's to the 1920's.

It was a time of big growth in population, urbanization and the plague.

Bible class is bringing us to interesting stories of butterflies and bats in the story of creation. They were introduced to a man in their book "Miracle of Bats" who grew up a Christian, became an atheist and then after studying the story of bats realized there had to be a God. He found his way back to God through a brown bat.

This was our last week of Ski Days. It was fun for all of the students, but it was also a very cold day. They kids have learned so much about skiing and are anxious to have skiing next year.

In math we are setting personal goals. As a group we were reviewing and discussing 4 different ways of multiplying numbers. It's a great refresher for older students and for some newer students it is helpful to learn to do it as
