School Movie Night. Come for some food, bake sale, and a movie in the gym.

More pictures of the field trip will be on Facebook

Teacher Martha's Class

We finished our Bible study on Jesus' resurrection. The kids have enjoyed learning more of the true reason for Easter. The bunny and eggs are fun, but most importantly is Jesus and His sacrifice for us, something we won't ever truly understand.

We have been working on our music and art projects for the spring art/science show. The kids have really enjoyed the different art projects. Please make sure you are scheduled for the program on Wednesday April 27 at 6:30 as all the kids are participating.

Work continues on the ABC books and all the name books are complete. Only 6 weeks of preschool left...where did the year go! I have really enjoyed watching the kids grow and mature over the last several months. I will be setting up parent conferences over the next 2 weeks. Sign up is by the front door.

Curious Kinders News

This week we began our week with Abram and Sarai arriving at the place God lead them in the land of Canaan. After unpacking, Abraham set up an alter and he and all those traveling with him worshipped and thanked God. The students made an alter with their memory verse on it. We continued our unit on pioneers and learned about the different grassland animals as well as the life cycles of the butterfly and ladybug. We have five caterpillars in the classroom now that we hope will all successfully morph into butterflies. We also have planted some seeds and iris bulbs that are coming along nicely. For math, we graphed different items and enjoyed learning about story problems. We also worked on phonics and sight words for language arts. We are having such interesting weather, aren't we? We postponed our fieldtrip from this week to Wednesday, April 20, to the botanical gardens. We are leaving early for this field trip at 8:45. Students will still need warm jackets as it will still be in the 40's in temperature when we arrive. Mittens might be a good idea too.

Mrs. Davidson's Classroom

We have had an exciting week! First, we had our spring Week of Prayer with chapel every day led by Pastor Steve. He talked about why Jesus came to earth and about His death, burial, and resurrection. Thank you, Pastor Steve! And THANK YOU, JESUS! Then on Thursday the students went to the Warhawk Air Museum in Nampa and had a great time looking at the airplanes and other artifacts. We are glad that several parents were able to go along.

Remember that the science fair and spring program are coming up on Wednesday, April 27. Information went home with the students earlier this week; if you didn't get it please ask your child or ask me for another copy. We also have a family movie night coming up on May 1 and you are all invited. Look for flyers to be posted at the school and more information to go home with students next week.

Have a blessed weekend as you contemplate the love and sacrifice of the Savior. Praise His holy name!

Mrs. Messecar's Classroom

What a week. Rain, sleet, snow & hail outside & busy young men & women inside. We've had a wonderful time in Week of Prayer with Pastor Steve telling about Jesus last few days before His death.

We've been studying saturation in Science class, using different temperatures water & sugar. Then we went on to observe how salt can change the freezing point/melting of water.

Thursday we went to the Warhawk Air Museum. It was an amazing experience for everyone. They had a great time doing a scavenger hunt. Some did more than one. This was the culmination of our last quarter on American History.

We highly encourage everyone to go, if you haven't
